

Please allow XM radio to provide local content. I listen to these channels and receive important safety information regarding traffic and weather problems. Since XM traffic and weather cycles constantly you can get the information without having to sit through songs, meaningless DJ chatter, and commercials while you wait for important info. I am happy to pay for the better quality service and quick access to important info. Competition is best for America and for me. Please do not bow to pressure to limit competition. Why protect service providers who don't provide the best service?
